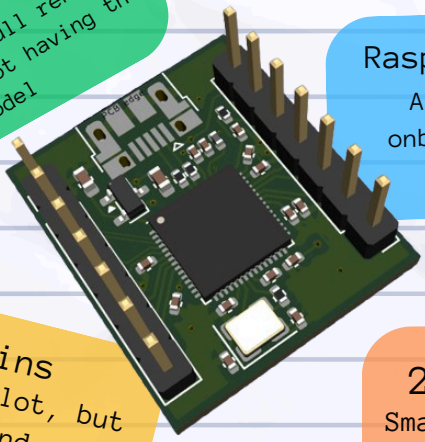
RP2354 Micro Devboard

Small RP2354 based devboard with a similar size to the Seeed Xiao

Micro USB (lol)

Don't blame me for not giving you a full render, blame KiCad not having the model



Raspberry Pi RP2354

A whole 2MB of flash onboard! But it saved a lot of space

10 GPIO pins

No, it's not a lot, but it needs to sound good somehow -_(ツ)_/-

2MB flash

Small flash is a compromise for small size

Only 2x2.25cm

About the same size as a Seeed Xiao RP2350!
